PROJECT EXPERIENCE

Residence Maintenance System Website

Role: Systems analyst

Tools: JavaScript, HTML, CSS, MySQL, Tableau

- Collaborated with a team to design a website for managing maintenance requests at university residences.
- Led requirements gathering sessions with stakeholders and documented functional and non-functional requirements.
- Developed professional system documentation (SRS, SDC), including use case diagrams and flowcharts.
- Ensured traceability between requirements and implementation for QA readiness.

EMPLOYMENT HISTORY

Junior Software Developer & QA Tester

Manut Service Pty (Ltd) | 2025 - Present

- Conduct manual testing on in-house applications, identifying and reporting bugs, and validating fixes.
- Collaborate with the development team to ensure software meets functional and business requirements.
- Assist in front-end development tasks and ensure consistent code quality.
- Maintain comprehensive documentation and support QA processes through test plans and user feedback.
- Analyze data to identify performance issues and enhance system functionality.

Subwarden

Rhodes University | 2024

- Provided guidance and support to students on academic and personal matters, fostering a positive and inclusive living environment.
- Acted as a liaison between students and university administration, ensuring smooth communication and conflict resolution.
- Developed strong leadership and interpersonal skills through mentoring and organizing student engagement activities.
